Air Cleaner Purifier – Blueair Classic

Price Enterprises, Inc. installed Air Purifiers in office spaces and work areas in an effort to ensure air quality remains at a healthy level for all employees and customers.

Blueair Classic Air Purifier:

The Blueair Classic air purifiers includes the HEPASilent technology that combines two filtration technologies (electrostatic & mechanical filtration). This added feature results in more clean air at a faster rate while quiet and energy efficient.

- Classic 280i:
 - Filters air in 279 sq. ft. every 12 minutes
 - DualProtection filter included for the ultimate particulate, gas, and odor removal
 - Filter Type: Classic 200 Series DualProtection Filter
- Classic 680i:
 - Filters air in 775 sq. ft. every 12 minutes
 - DualProtection filter included for the ultimate particulate, gas, and odor removal
 - Filter Type: Classic 500/ 600 Series DualProtection Filter

Health Features:

- HEPASilent technology captures at least 99.97% of airborne particles down to 0.1 microns in size.
- Helps prevent sickness from virus and bacteria by limiting the number of airborne germs. Captures and kills bacteria & viruses using the HEPASilent technology.
- Relief from Asthma and Allergies by providing a high clean air delivery rate.
- Increased productivity by improving air quality in the workplace. A recent study by Harvard University found that when office air quality was improved, productivity increased by 61%.

Maintenance & Cleaning:

For system maintenance and cleaning the Air Purifier will be dusted and wiped down daily with a micro-fiber cloth. Filters will be replaced every 6 months (4,380 hrs.) or as needed and will be logged on the Air Purifier Filter Log by the manager.
